Commissioner for Patents

Attached is the examiner's response to application's communication filed December 16, 2005.

Response to Amendment

1. All pending claims are allowable. Since applicant filed a divisional reissue application on October 13, 2005 (SN 11/251,013) containing the non-elected claims (added claims 19-40), further action on the application is SUSPENDED FOR A PERIOD OF 6 MONTHS from the mailing date of this response - to await examination of the divisional reissue application. Upon expiration of the period of suspension, applicant should make an inquiry as to the status of the application.

Once the divisional reissue application containing the added claims is examined and becomes allowable, the examiner will issue a requirement under 37 CFR 1.177(c) for applicant to merge the claims of the suspended first reissue application with the allowable claims of the divisional reissue application into a single application, by placing all of the claims in one of the applications and expressly abandoning the other. The Office action making this requirement will set a two-month period for compliance with the requirement. If applicant fails to timely respond to the Office action, or otherwise refuses to comply with the requirement made, then the divisional reissue application (claiming the invention which was non-elected in the now-suspended first reissue application) will be passed to issue alone, since the claims of the divisional reissue application, by themselves, do correct an error in the original patent. Prosecution will be reopened in the suspended first reissue application, and a rejection based on a lack of error under 35 U.S.C. 251 will then be made. This rejection may be made final, since applicant is on notice of the consequences of not complying with the merger requirement.

If the divisional reissue application becomes abandoned, prosecution will be reopened in the suspended first reissue application, and a rejection based on a lack of error under 35 U.S.C. 251 will then be made in the first reissue application. Since no error in the original patent is being corrected in the first reissue application, no reissue patent will issue. see MPEP 1450 [R-2].
